Endcap Sign Channel Systems

1. Insert screws through front of sign channel then secure arms to channel with plastic thumb nuts.
2. Peg board mounting (see instructions to the right)
3. Insert arms into back plates.
4. Slide signs into front and back J-Channels.

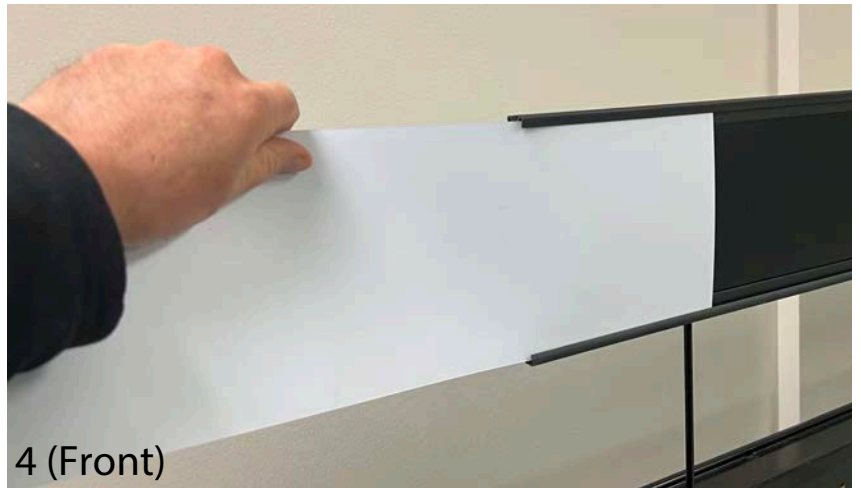

A. Determine sign channel height position* above gondola for backplate and insert the top prongs of backplate into pegboard.
**Can be inserted from 2nd set of holes from top to have highest lift above product or insert into 7th-8th set of holes from top to make sign channel flush with top of gondola.*

B. Lower backplates to rest flush against pegboard.

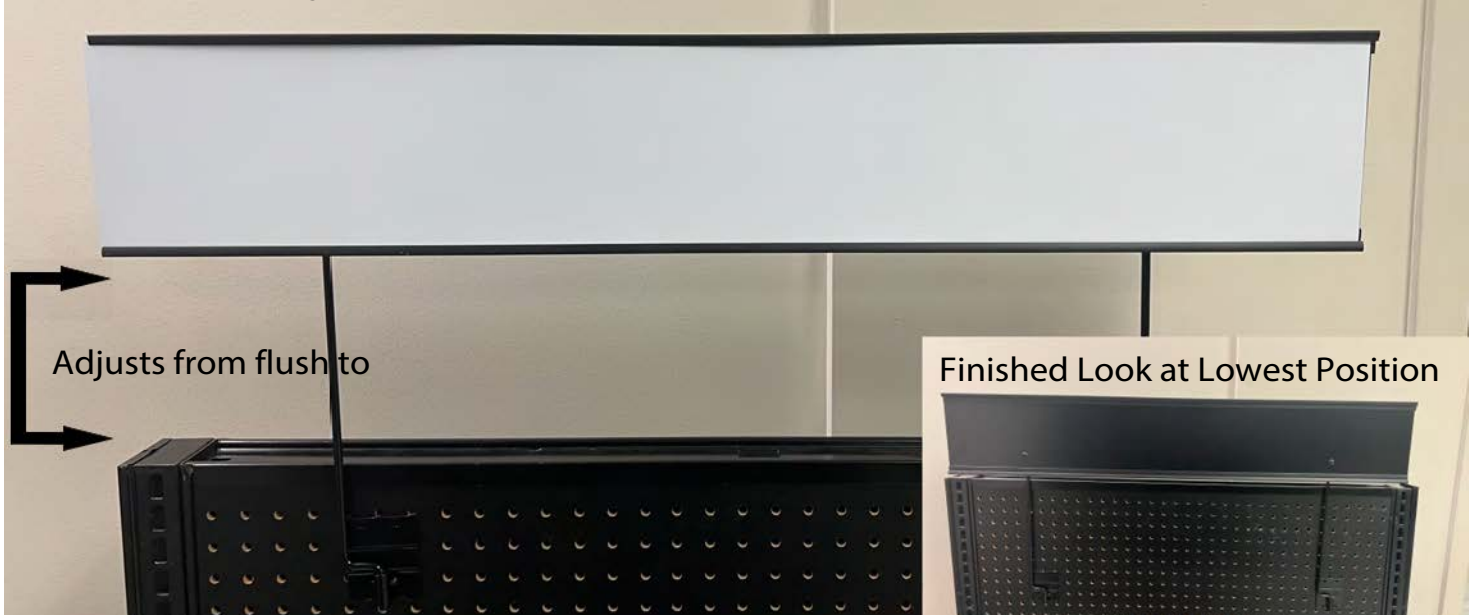

Repeat steps A and B* for second backplate when ready to move to Step 3.

**Place the second backplate to align with arms.*

(The backplates should be inserted between the 4th & 7th holes from the left & right sides of the uprights.)
